

PADESWOOD CARBON CAPTURE AND STORAGE

Making Flintshire a world leader in net zero cement

Initial consultation Wednesday 25 January – Tuesday 21 February 2023

We are consulting on plans to install carbon capture technology at our Padeswood cement works – the UK's first net zero cement facility. Our plans are a stepping-stone to decarbonising the construction industry and we are proud to bring forward a global exemplar project.

Once completed, the new facility will:

Capture **800,000 tonnes** of CO₂ per year. The equivalent of taking **320,000 cars** off the road

Protect **222** and create **54** new jobs

Help put north Wales at the forefront of **net zero**

This is an integral part of HyNet, the UK's leading industrial decarbonisation project.

The upcoming consultation will provide you with additional opportunities to speak to the project team, ask any questions you may have, and give feedback on our plans.

As part of this, we are holding a series of in-person events and webinars.

Emmanuel Church Penyffordd
42 Vounog Hill, Penyffordd, Chester CH4 0EZ
Friday 3 February, 10:00-19:00
